## At a glance

For Azerbaijan, the labour legislation applicable at the national level is analysed and scored. Different rules may apply in other jurisdictions, necessitating review of other sources.

Following this approach, Azerbaijan's overall score is 90.5 out of 100. The overall score for Azerbaijan is greater than the regional average observed across Caucasus and Central Asia (83). Within the Caucasus and Central Asia region, the highest score is observed for Azerbaijan.

Azerbaijan has shown an overall improvement in its score due to reforms in the Fair Treatment indicator by removing restrictions on women's employment and allowing women to work in the same jobs as men. The score on sickness benefits is also adjusted to 1.

The country scores on the Labour Rights Index must be interpreted with caution, considering also the contextual indicators like the size of the population and labour force, informal employment in the country, social protection coverage, level of economic development (as measured by GDP per capita), female labour force participation rate, incidence of non-standard employment in the form of part-time employment and temporary employment as well as work injuries, both fatal and non-fatal. Trade union density and collective bargaining coverage rates are also relevant contextual indicators to assess the state of freedom of association and collective bargaining in the country.

For each indicator, the score ranges from 0 to 100, where 100 signifies the highest possible score and 0 signifies the lowest score. The overall score is the average of 10 indicators.

## About Labour Rights Index

The Labour Rights Index 2024 (LRI 2024) is a de-jure index covering 145 economies and structured around the working lifespan of a worker. In total, 46 questions or evaluation criteria are scored across 10 indicators. The overall score is calculated by taking the average of each indicator, with 100 being the highest possible score. The Index uses a rating system, ranging from "Total Lack of Access to Decent Work" to "Access to Decent Work". The Labour Rights Index aims at an active contribution to the Sustainable Development Goals, by providing necessary (complementary) insights into de jure provisions on issues covered in particular by SDG 5 (Gender Equality), SDG 8 (Decent Jobs), SDG 10 (Reduced Inequalities) and SDG 16 (Strong Institutions). The Labour Rights Index scores countries based on applicable labour laws only. It does not comment on actual working conditions or labour law compliance in workplaces. The legislation that is used to score the country under the Labour Rights Index is generally national or federal level legislation. In cases where the legislation is enacted at the provincial/regional or state level, the Index analyses the labour legislation applicable to the most populous province/region or state (in federal, confederal or other complex structure states). Scoring for each country is based on labour legislation, as applicable on 1 January 2024.

<sup>1</sup> Proportion of population living below the national poverty line (%), as measured under the SDG 1.2.1

<sup>2</sup> Share of informal employment in total employment (%), as measured under the SDG 8.3.1

<sup>3</sup> Proportion of the country population covered by social protection floors, as measured under the SDG 1.3.1

<sup>4</sup> The female labour force is shown in absolute number (A) along with the female labour force participation rate (B)

<sup>5</sup> Non-Standard Employment has been defined as part-time employment (A) and temporary employment (B)

<sup>6</sup> Rate of fatal (A) and non-fatal work injuries (B) per 100,000 workers, as measured under the SDG 8.8.1

<sup>7</sup> Minimum Wage and Living Wage amounts are shown in local currency. The amounts are retrieved from the WageIndicator Minimum Wage Database and the WageIndicator Living Wage Database. The minimum wage amounts are those as were applicable on 1 April 2024. The Living Wage amounts are from the April 2024 data release by the WageIndicator. Given the declining share of labour income (a widely used measure of inequality, measuring the proportion of total income in a country that employed people earn by working), the contextual indicators on minimum wage and living wage are relevant.

<sup>8</sup> Robust legislation, backed by effective enforcement, forms the foundation for achieving decent work in practice. In this regard, it is relevant to see if the country has an adequate number of labour inspectors. While the Labour Inspection Convention, 1947 (No. 81) calls for a "sufficient number" of inspectors to do the work required, there is currently no official definition for a sufficient number of inspectors. In its 2006 General Survey on Labour Inspection, the ILO referred to the following benchmarks on the number of labour inspectors in the country in relation to the labour force: 1:10,000 in industrial market economies, 1:15,000 in rapidly industrializing economies, 1:20,000 in transition economies, and 1:40,000 in less developed countries. The latest guidance from the ILO (2022) however emphasizes a more holistic evaluation of national context rather than solely a ratio of labour inspectors to the size of labour force.

<sup>9</sup> The Living Wage estimates shown in this country profile are for a typical family (lower bound) that comprises two adults. The number of children is determined by the country-specific fertility rate, representing the average number of children in a family. One adult is engaged for 100% of normal working hours, while the working hours of the second adult are approximated based on the national labour force participation rate. The combined wage earned by two adults, each receiving a living wage, is designed to meet the requirements for achieving a decent standard of living for the family. For further details on this, please check here: <https://wageindicator.org/salary/living-wage>

<sup>10</sup> The prohibited grounds for discrimination are "race, colour, sex, religion, political opinion, national extraction or social origin, age, disability and trade union membership". A score of 1 is assigned only if a country has prohibited discrimination on at least 7 of the above 10 grounds.

<sup>11</sup> The Freedom of Association indicator of the Labour Rights Index uses Observations/Direct Requests from the ILO Committee of Experts on Application of Conventions and Recommendations (CEACR), the US Department of State's Country Reports on Human Rights Practices (USDOS CRHRP) and the country's legal profiles under the ITUC Global Rights Index 2024 to measure a country's compliance with the right to freedom of association and collective bargaining. A country's score on the LRI's Freedom of Association indicator must also be read together with the SDG indicator 8.8.2, which measures the level of national compliance with labour rights (freedom of association and collective bargaining) based on ILO textual sources and national legislation. It has a range from 0 to 10, with 0 being the best possible score (indicating higher levels of compliance with FACH rights) and 10 the worst (indicating lower levels of compliance with FACH rights). The score for Azerbaijan on the latest available data of the SDG 8.8.2 is "0.54" (2022). Other than SDG 8.8.2, we suggest considering the country's score on ITUC's latest Global Rights Index. The score for Azerbaijan in 2024 is "n.a.". As explained by the ITUC, "Countries are rated in clusters from 1-5+ depending on their compliance with collective labour rights, with 1 being the best rating and 5+ the worst rating a country could get. A high-rated cluster means that workers in the country have no right to their collective voice due to government failure to guarantee rights".

<sup>12</sup> In order to measure the trend in country's legislative performance over the last edition of the Labour Rights Index (2022), the legislative table indicates improvement or worsening of de-jure labour rights in country through the following colours.

● Score improved due to a positive legislative reform

● Score worsened due to a negative legislative reform

● Score is adjusted for the country due to a minor revision in the methodology for the Social Security indicator

● Score is adjusted for the country due to better access to the country's legal sources, or where the score for the Freedom of Association indicator is adjusted based on the latest reports from ILO, USDOS & ITUC Global Rights Index 2024
